JULY 1985

This publication is issued annually in July to show retail electricity rates and selected bills for customers of Ontario Hydro and the Associated Municipal Utilities. Section 1 provides the most commonly used retail rates of each of the 316 municipal utilities as well as the rates for Ontario Hydro's Retail System. The rate classes shown in Section 1 are Residential, General, Small Commercial, Commercial, Industrial and General over 5000 kW. There are no bill comparisons for the General Over 5000 kW classification.

313 utilities had rate changes from July 1, 1984 to July 1, 1985.

Before using data from this report, the user should read the Explanatory Notes, which precede each section, to become familiar with the contents of the tables.

Section 2

- The calculated bills shown in Tables 1 and 2 are based on rates contained in Section 1 and therefore do not include the Rural Rate assistance.

- Graph 1 presents trends in the average bills of the residential rate class for low and medium energy use. Graph 2 presents the trend in the residential class end rate ¢ per kW.h. This trend represents the average end rate of the 316 municipalities, each weighted by its customers in the residential class.

- Graphs 3 to 16 show distributions of the 316 municipalities according to the bill size for each of the comparative bills reported. The median is defined as the value for the middle utility, ie., 50 per cent of the utilities have a value greater than the median, and 50 per cent a value lower. The average is the arithmetic average of the comparative bills of the 316 municipal utilities. The weighted average is obtained by multiplying the comparative bill of each of the 316 municipal utilities by its customers in the rate class, and dividing the sum of these weighted bills by the total number of customers in the rate class.
